UiPath

Studio 2021.10.7  
Academic Alliance License  
User-mode Installation  
Expires in 52 weeks

Open

**Open a Local Project**  
Navigate and open an existing project

**Clone or Check Out**  
Open from source control repositories like GIT, TFS or SVN

New Project

**Process**  
Start with a blank project to design a new automation process.

**Library**  
Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.

**Test Automation**  
Start with a blank project to create a new test project

**Template**  
Create a template that you can use to build automations that have a set of predefined common characteristics.

New from Template

**Background Process**  
Create a process that starts in the Background and can run concurrently with other processes for as long as it doesn't use UI interaction.

**Mobile Testing Project**  
Create a project for your mobile app automated test cases

**Orchestration Project**  
Create a project for your mobile app automated test cases  
Implement a process through service orchestration and human intervention as well as through long-running transactions
